

The Carbon Chronicle

Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 32: No. 8

ACME, ALBERTA, THURSDAY, MARCH 26th, 1953

\$1.50 a Year; 5c a Copy

Mr. Ed Ohlhauser has completed the new shelves for the library. They will be installed as soon as possible.

Mr. and Mrs. Albert McAlpine and family are visiting at the home of his parents, Mr. and Mrs. A. R. McAlpine. Albert is on leave from the R.C.A.F. base at Fort Nelson, B.C.

Lawrence Zeigler and his new bride are now living on the farm of the former's parents. Mrs. Zeigler is formerly of Vancouver. A party is planned for Friday evening at the home of Earland Zeigler to welcome the couple to the district.

The Baptist Church Choir will render an Easter Cantata "The Living Redeemer" by Rachel K. Green on Good Friday night, April 3rd at 7:30 p.m.

The Sunday School will give their Easter Program April 5th at 7:30 p.m.

The results of the High School Bonspiel were as follows:

FIRST EVENT

- First Prize—
1. Ray Cannings.
2. Morley Buyer.
3. Bill Mucha.
4. Marylin Martin.
Second Prize—
1. Jim Foster.
2. Lynn McCracken.
3. Francis Bushby.
4. Aaron Droder.

SECOND EVENT

- First Prize—
1. Roger Tetz
2. Dennis Marshman.
3. Florence McMann.
4. Wayne Garrett.
Second Prize—
1. Alvin Harsch.
2. Shirley McMann.
3. Arthur Hoivik.
4. Diane Bushby.

THIRD EVENT

- First Prize—
1. Jim Cooper.
2. Leona Rempfer.
3. Janet Hecktor.
4. Shirley Hecktor.
Second Prize—
1. Vernon Bettcher.
2. Bob Ohlhauser.
3. Mervin Diede.
4. Dwight Bettcher.

Mrs. Don Martin and family have been visiting at the home of Mr. and Mrs. Charlie Martin.

The Legion is holding a Card Party on Friday, March 27 at 8 p.m.

A number of the Lions from Carbon will be curling in the Annual Lions Bonspiel on Wednesday, March 25th in Calgary.

S. Rauner's Auction Sale will be held 4 miles west and 2 miles north of Sunnyslope on Tuesday, April 7th at 11 a.m. N. Boese and D. Peters, Auctioneers.

The Carbon Students Union will have a Bake Sale on Sat., March 28th in the Legion Hall. This event was postponed last Saturday because of the sudden storm.

A free show was given for the younger people of Carbon in the Scout Hall on March 24th. We understand that this was a belated Christmas present and enjoyed very much by all the children present.

The Minstrel Show sponsored by the Carbon United Church staged a delightful performance in the hall in Rosebud on Mon., March 23rd. The same group will perform before the Carbon audience on Wed., March 25th.

FOR SALE—Kitchen Cabinet, 4 ft. wide, 6 ft. high and 28 in. deep, large drawers and roomy shelves. In excellent condition. Price \$50.00.

YOUR RED CROSS WHAT IS IT DOING?

PICTURE above are high school students visiting the patients at the Junior Red Cross crippled childrens hospital in Regina. Over 113,000 Junior Red Cross members in Saskatchewan provide treats, entertainment, gifts and financial help to crippled children in their own Junior Red Cross Hospital.

The Junior Red Cross administration is provided for by the annual Senior Red Cross Campaign for funds. In this way every cent given by the Juniors can be used to provide care for Saskatchewan crippled

children through the Junior Fund. Help is also given to needy children at home or abroad through the Juniors' National Service Fund.

The Junior Red Cross is an active organization, each branch holds regular meetings in the school room. These meetings are conducted with correct parliamentary procedure under the guidance of the teacher. The Juniors study health rules, good citizenship and do a great deal towards better understanding between the children of many nations.

Whenever you see a Red Cross on a schoolroom window you will know that a Junior Red Cross branch is organized for the good of all children.

The Junior Red Cross is one of the many vitally important services that the Saskatchewan Red Cross is rendering. Other services that are familiar to all are the Blood Transfusion Service, Swimming and Water Safety programme, Mothers Milk Service, Veterans Services, Civilian Disaster Relief, Outpost and Nursing Stations.

VERY OLD CUSTOM

FREDERICTON.—The annual quilt rent to the Crown—one cent—was paid recently when the University of New Brunswick observed Founders' Day and its 153rd anniversary. Dr. A. W. Trueman, university president, handed the copper to Lieutenant-Governor D. L. MacLaren.

Funny and Otherwise

Policeman—Do you mean to say this physical wreck tried to grab your purse out of your hand?
Woman—But he wasn't a physical wreck—until he grabbed my purse.

Old Lady (at seashore): "Can't something be done for that ship in distress?"

Coast Guard: "It's all right, mum. We have sent a line to the crew to come ashore."

Old Lady: "Good gracious. Must they have a formal invitation in a time like this?"

"Was the doctor busy?"
"Oh, yes. He had a notice hung up in the surgery: 'Have your symptoms ready, please.'"

"I'm getting so fat that I can scarcely stoop over to lace my boots. Now doctor, what would you advise me to do for it?"
"Wear slippers."

Visitor: "I suppose they ask a lot for the rent of this flat?"
Hostess: "Yes, they asked Harold seven times last month."

Sally: Money isn't everything. Some things are bigger than money.

Sue: Yeah, bills.

A dignified man on the bus was bringing a pair of shoes home to his wife from the repair shop, but he hadn't been given any wrapping material.

The man opposite was interested. Finally he leaned over, tapped

the dignified one on the knee and said with a knowing wink, "That's right—don't let her run around."

Sunny: I heard that Mr. Smith isn't welcome at the Jones' house anymore, and that it all started the night he accepted their invitation to dinner.

Honey: Yes, he wanted to show his appreciation for the dinner invitation, so he brought a gift.

Sunny: What's wrong with that?
Honey: The gift was a cookbook.

A minister, meditating on a deep problem, told his new housekeeper that in no circumstances were callers to be admitted—except, of course, he added, in a case of life and death. Half an hour later the woman knocked at the door.

"I thought I told you—" the minister began.

"Yes, I told him," she replied, "but he says it is a question of life and death."

So he went downstairs and found an insurance agent waiting.

Some butterflies migrate in swarms.

Fish Catch Is Third Of Normal

OTTAWA.—The Bureau of Statistics reported that the January landings of sea fish by Canadian fishermen dropped to 32,561,000 pounds, compared with 117,127,000 pounds in the same month of 1952.

The Bureau said the strike of British Columbia's main herring fleet during the month was the principal factor in reducing the total. In spite of the sharp drop in landings, the Bureau said the value of catch was down only 25 per cent, from \$3,179,000 to \$2,374,000.

Boston, Mass., was named for Boston, England. 3029

Now Many Wear FALSE TEETH With Little Worry

Eat, talk, laugh or sneeze without fear of insecure false teeth dropping, slipping or wobbling. FASTEETH holds plates firmer and more comfortably. This pleasant powder has no gummy, gooey, pasty taste or feeling. Doesn't cause nausea. It's alkaline (non-acid). Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

Tea at its best!

ORANGE PEKOE

REAL HELP FOR Your Itching Piles OR NO COST

If Hem-Roid, an internal pile treatment, does not quickly ease the itching, soreness and burning pain of your piles—it costs you nothing. Get a package of Hem-Roid at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.59 for the big 60 tablet package. If you are not 100% pleased after using Hem-Roid 2 or 3 days, as a test, ask for your money back. Refund agreement by all drug stores.

For overnight relief of KIDDIES' CHEST COLDS

USE A RUB WISE
MOTHERS SWEAR BY

It is a snow-white highly-medicated rub that vanishes—to bring almost instant easing of stuffed-up nose, tight chest and cough-irritated throat. Ask your druggist for BUCKLEY'S Stainless WHITE RUB. Only 50¢.

FREE . . . If you are at all skeptical of its amazing merit send a 4¢ stamp for trial jar to Department "W", W. K. Buckley Limited, 559 College St., Toronto, Ontario.

Success Tip— Bake it with MAGIC!

DATE-ORANGE PUDDING

Combine in a greased casserole (6-cup size) ¾ c. corn syrup, 1 tbs. grated lemon rind and ½ c. orange juice. Mix and sift once, then sift into a bowl, 1 ½ c. once-sifted pastry flour (or 1 ½ c. once-sifted hard-wheat flour), 2 ½ tps. Magic Baking Powder, ½ tsp. salt and ¼ c. fine granulated sugar. Mix in ¾ c. corn flakes, slightly crushed, and ½ c. cut-up pitted dates. Combine 1 well-beaten egg, ½ c. milk, ½ tsp. vanilla and 3 tbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into prepared dish. Bake in moderately hot oven, 375°, about 40 minutes. Serve warm, with pouring cream. Yield—6 servings.

... gives you nutritious
main courses
at economy prices!

No need to cut down on main dish goodness just because prices are high!

Start with a simple, inexpensive dish and let INGERSOLL BABY ROLL CHEESE add extra flavor and nutrition. Just see what a wonderful lift Ingersoll Baby Roll gives to omelets, hamburgers, grilled sandwiches . . . to any dish where cheese can be used!

Let Ingersoll Baby Roll spark your main course menus two or three times this week. You'll find you're money in pocket and you're enjoying more delicious and varied meals than ever before! Be sure you ask for genuine INGERSOLL BABY ROLL.

A Man Short

When a team is a man short the best plan is to have the fastest and best checking players forecheck aggressively with the checkers coming back fast to cover the wings if they are beaten. If the opposition play a shooting-in game, assign your fastest wing to the job of coming back well ahead of his check, who is picked up about at centre ice. He should skate a little ahead of his man until he sees the puck-carrier start to shoot, then he should burst in hard to get the puck and clear it.

The wings should always try to force the attacking team to carry the puck up the centre lane so that it cannot be carried in at the side and thus force the defence pair to spread. If the puck is carried up the side, the checker should force the puck-carrier close to the boards.

Once the puck-carrier has crossed his own blue line, the checker should not try to check him head on, but should take the inside position and check him from the side. The attacker in the centre should be left to the defence and the other man covered by the other wing.

Another way to use up valuable time is to rag the puck by trying only to keep possession and not to advance the puck up the ice. This should only be attempted in the middle ice area. If the coach has a particularly skillful stickhandler on his squad, he should put him on the ice and instruct the other players to keep feeding the puck to him.

Finally, the wise coach will give

his players plenty of practice in the one man short situation so that they will develop a definite sense of their duties and learn by experience the best tactics to use.

Table Tennis Tip

Most beginners have a tendency to hit their service too high. This is caused by hitting down on the ball too much. To avoid this, hit the ball with a forward motion with your racquet almost vertical to the table. With your left hand, toss the ball about six inches above the table (making certain that you are behind the table about one yard). Then, much the same as the topspin forehand stroke, bring your arm through and around. Try this slowly at first and as you get used to it you will find your services gain speed and you will soon be able to hit the ball quite hard. And above all, try to hit your service as deep into your opponent's territory as possible.

After Activity Aid

To replace the energy fuel (carbohydrates) you have used in your activity you should be sure to take in a good supply of foods high in carbohydrates. The best are honey, oranges (lots of dextrose—an ideal energy fuel), grapes, and dried fruits. An ideal recovery beverage is a large glass of Ovaltine (which is high in carbohydrates) and honey.

Some 30,000 years ago North America was covered with a layer of ice hundreds of feet thick.

46 Spirited Animals

Mounties Face Big Problem Of Sending Horses To Coronation

OTTAWA.—How do you get 46 spirited horses overseas for the coronation? This was the knottiest problem in 16 years for the Royal Canadian Mounted Police but the famed force announced it has been solved. The horses will be shipped in "freight palace cars" from Ottawa to Montreal and in special boat stalls from Montreal to London.

The horses will be ridden by a full mounted troop of 35 R.C.M.P. officers, non-commissioned officers and constables in the coronation procession in London in June. They also will be used by the scarlet-clad mounties for a number of performances of the famed musical ride during coronation celebrations.

The force said it experienced considerable difficulty in making arrangements for shipping the horses to Britain.

"There isn't much traffic these days in the movement of horses by boat across the Atlantic," said Supt. L. Bingham of the adjutant's branch. "We had considered negotiations with a number of steamship companies before we were able to arrange passage for our horses."

However, Bingham said that while the transportation problem was the biggest the force had faced in recent years, officers were able to call on past experience for help. The last time the force moved horses to England was in 1937 for the Coronation

of King George VI.

The animals, now being trained for the coronation at the forces Rockcliffe barracks outside Ottawa, will be moved late in April. They will travel in "freight palace cars" and will be put aboard the Canadian Pacific freighter, Beaverburn, on arrival at Montreal.

"Every precaution will be taken in the feeding of the animals during the ocean trip," Bingham said. "We have calculated the amount of feed the horses will need with some to spare."

Another problem the force faced was synchronizing the arrival in London of the horses and the mounties who will ride in the coronation procession.

"This was important," Bingham said. "The animals will be thoroughly trained by the time they are put aboard the Beaverburn in Montreal. They will receive some exercise during the voyage, but must be cared for and exercised by their own riders immediately on their arrival in London."

In order to make this possible, the Beaverburn will leave Montreal April 30 and arrive in London about May 8. The riders, however, will sail from Canada April 25 on the liner Scythia, and will be in London to meet their mounts.

Ten non-commissioned officers and constables will accompany the horses on their overseas trip. The animals will be housed in special stalls built on the Beaverburn, and a small space will be provided for daily exercise.

On arrival in London, the horses will be placed in stables in Hyde Park, and feed will be provided by United Kingdom authorities. Between May 8 and the coronation, the horses and their riders will train in Hyde Park for the role they will play in the coronation celebrations.

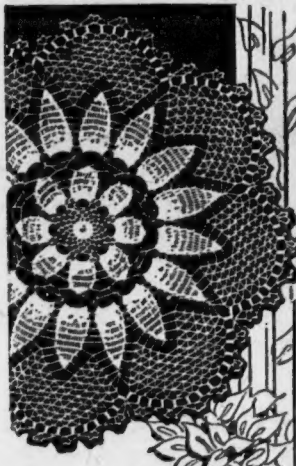

The force has also had to make special arrangements for the shipment of saddlery overseas. Saddles will be packed in special bags to prevent moulding and other equipment in sealed boxes.

The average household refrigerator contains approximately 200 pounds of steel.

CANADIANS DONATE TO FLOOD VICTIMS—Through contributions of officers and men of the 27th Canadian Infantry Brigade group stationed at Hanover, Germany, 3,308 guilders, approximately \$1,000, have been donated to the Dutch flood victims. Thomas A. Stone, Canadian ambassador to the Netherlands, (right), presents the cheque for this amount to Lieut.-Gen. P. Alons, director of the Dutch National Disaster fund at the Canadian embassy in the Hague. Representing the 27th Brigade at the ceremony was Major R. A. Briggs, Vancouver. A similar amount was contributed by the brigade to the Lord Mayor's disaster fund through Canada House, London, for flood victims in the United Kingdom.

RECENTLY this pigeon won in a photo finish for third place in the first race. The pigeon appears to be crossing the line just ahead of Bog's Pride (10), but the track stewards decided that McCreight (4) was rightfully entitled to third place.

—Central Press Canadian.
STAGE HIT-RUN AIR ATTACK—Taken on the Korean front, these photos show how U.S. Marines are using helicopters for swift hit-and-run rocket operations against enemy positions. At top, a giant "chopper" picks up a multiple launcher. Reaching a desired spot in the combat zone, (centre), 'copters land and unload launchers and crews and wait until everything is set up. At bottom, the blitz is on and rockets streak toward Red positions. No time is then wasted in making a getaway.

IMMIGRANT BUILDS HOME, FACTORY FOR HIMSELF—Less than two years ago, Walter Sturm operated a factory at Neustadt, Germany. He could see no future there, so he had the machinery crated and moved with his wife, Annie, and daughter Hildegard to Warton, Ont. "I wouldn't have believed that people could be so wonderful as they have been to me here," says Walter, who, with only his wife to aid him, has built a small factory and adjoining home, and is busy turning out wood products. He borrowed money, but refused assistance in building the factory and in turning out his wood products.—Central Press Canadian.

ONE OF THOUSANDS—Pathetic in her tattered clothing, this little girl of Hong Kong is one of thousands who roam the streets seeking food and shelter. Refugee centres have been established through funds raised in North America and Europe but they are not large enough to care for all those made homeless by war.—Central Press Canadian.

NEW DIRECTOR OF VOICE OF AMERICA—Dr. Robert L. Johnson, president of Temple university in Philadelphia, has accepted the directorship of the Voice of America and other U.S. services. He will be ready to assume his new duties soon. The Voice of America broadcasts Western propaganda to people behind the iron curtain.—Central Press Canadian.

ATTACKED BY PHEASANT—Milkman Jack Crawford, of Weymouth, Mass., uses a carrier rack as a shield against attack from a pheasant that rushes out of nearby woods and tries to peck at him. For some unexplained reason, the bird chases all milkmen, but not mailmen or salesmen. And the hunting season can't come too soon for Crawford who becomes a target as soon as he parks his truck.

BUTCH BOUCHARD, Montreal Canadiens' veteran rearguard, is shown above being congratulated by Ted Lindsay during a recent game during which Butch was presented with numerous gifts in recognition for his services during the last 12 years. The presentations went off smoothly but the game was lost to the league leaders as the Canadiens took on the big red machine and referee Udvari. That's Mrs. Bouchard on the left.

RABIES

By DR. E. E. BALLANTYNE
Director Veterinary Services
Alberta Dept. of Agriculture
FIFTH IN SERIES ON RABIES

HORSE

In the horse, often the first symptom is an intense itching of the bitten place (lips, nose), which causes extreme rubbing. Fear and restlessness are obvious. The animals stare, paw and grab at the manger with the teeth and move the ears continually. With the development of mania, the horse may attack other animals and man, and may direct the attack against some particular individual. The periods between such attacks are variable. They may bite them-

selves, tearing out parts of the flesh, or bite viciously on parts of the stall, injuring the mouth and breaking the teeth. As in other species, diagnosis in the early stages may be difficult because of the absence of excitation, especially at the onset, between spasms and even during the entire course (paralytic type). Finally, paralysis is general, the end coming on the fifth to eighth day, as in the dog. Again, as in

dogs, the paralytic or dumb form is common without the animal being furious.

CATTLE

Cattle are restless, excitable and aggressive, though at first these symptoms may be periodic and somewhat indefinite. They stand in one place, raise and lower the head, retract the upper lip, bore with the horns, and show spasms of the muscles of the limbs by sudden jerking movements of the legs. There may be periodic attacks of excitement when they exert every effort to break loose from the stanchion. Between such spells they are apparently normal. In most cases there is a prolonged hoarse bellow. They rub and bite salivate and grate the teeth. The digestive symptoms are loss of appetite, suspended chewing of the cud, bloating, inability to

swallow, and impaction of the rumen with extreme straining. The bloating and other symptoms of choke have led to suspicion of a foreign body in the throat. Other symptoms are spasms of the neck muscles and switching the tail. The initial paralysis is in the throat or hind parts, leading to death in the usual time.

SHEEP

In sheep the symptoms are similar to those in cattle, though excitement is often lacking. Excitement is manifested by restlessness, stamping the feet, and marked sexual desire shown by riding other animals. Gnawing and licking on the wound are common.

SWINE

Swine attack other animals, even their own young, when ex-

IN MEMORIAM

SAUNDERS—

In loving memory of Leslie Herbert Saunders, who passed away March 31, 1951:

"Loving and kind
In all his ways,
Upright and just
To the end of his days.
Sincere and kind
In heart and mind
What a beautiful memory
He left behind."

Ever remembered and loved by his wife and family, Mrs. Doris Saunders, Shirley, Murray and Marie.

cited. They hide in the straw, gnaw at the wound and soon become paralyzed. In most of the cases in Alberta the hogs just refused to eat, dying in a few days from paralysis of the legs.

DR. F. J. GREANEY,
Director,
Line Elevators Farm Service,
Winnipeg, Manitoba.
Sponsored by the following companies:
Federal, Alberta Pacific, Pioneer, Canadian
Consolidated, Paterson, McCabe, Parrish &
Heimbecker, Inter Ceecon, Independent,
Ellison Milling, Canada West and Quaker
Oats.

Seed Treatment—Does It Pay?

For a dollar spent on seed treatment the return is usually two dollars, and often much more. This is the opinion of many independent farmers and research men. Yes, seed treatment pays that well!

Why Treat Seed? In examining and testing thousands of farmers' seed samples of wheat, oats, barley and flax, the Line Elevators Farm Service finds that a large proportion of the seed-grain farmers in Western Canada sow each year is contaminated with smut, or is damaged by threshing or weathering, in sufficient amount to make seed treatment necessary and profitable. Sowing diseased or damaged seed without treatment invariably results in poor field germination, thin stands and hence "weedy" crops. The final result is, of course, reduced yields of poorer quality grain. This department is convinced that no farming practice will produce greater returns for the money and time invested than will seed treatment.

Many Chemicals Available. There are many kinds or types of seed-treating chemicals on the market today for grain crops. Some of them are "single-purpose" seed treatments, that is, they will control one particular disease of one particular crop only. Others are "dual-purpose" seed treatments, which effectively control not only smut, and other seed-borne diseases, but wireworms as well. The best advice we can give to farmers concerning seed treatment is this: Be sure and buy the seed-treating chemical that will do the job you want it to do. If in doubt, seek the advice of your local Agricultural Representative, or write to your nearest University, or Dominion Laboratory of Plant Pathology (Winnipeg, Saskatoon or Edmonton). Your local Line Elevator Agent can also help you. Ask him for a copy of our 1953 Seed Treatment Chart. Don't take a chance! Treat all your seed-grain this Spring. Yes, it pays!

Garden Notes

For Amateur Gardeners

KEEP IT SIMPLE

It is usually a mistake and especially so where space is limited to be too formal in planting about the house. Straight rows of flowers, shrubs and trees look stiff and artificial. Flowers particularly will make a better show if arranged in clumps with the smaller sorts in front and the larger ones grouped to the rear. The same is true of shrubbery. Unless the grounds are very large, one should be content with only one or two trees. The main idea is to screen a bit of the house and the fences here and there but not to hide the line completely. With shrubbery and trees it is important to remember the full size at maturity and allow plenty of room. Big things planted close to walls will have no room to develop properly.

THE LAWN

There are only a few fundamentals to bear in mind, in the handling of a lawn. The first of these is good quality seed especially prepared for lawns, not just some cheap, coarse grasses which will soon become ragged. The second point is to realize that grass is a plant and needs food and care just the same as a flower or a vegetable.

Grasses thrive best in cool damp weather, therefore it is most important that the ground be prepared and the seed sown as soon as possible in the spring, and in any case before the really hot weather commences. If this is not possible one should wait until early fall. Because lawns are permanent, it is much easier to get the soil well worked, fine and level before seeding than afterwards. For obvious reasons the seed should be sown on a day when there is no wind and it is best to go over the plot twice, broadcasting one way, then the other. Because the plants are tender at first especially so, it is advisable to cut with a very sharp mower. Well rotted manure, and chemical fertilizers rich in nitrogen are recommended for lawns and also an occasional application of bone meal. Well fed grass will crowd out most weeds. The rest can be handled with some of the new 2-4-D chemical sprays.

TO SAVE TIME

One of the quickest ways to produce flowers and vegetables is to use started plants. These can go outside almost as soon as it is safe to sow seeds. If handled carefully one can have flowers and new vegetables at least two weeks ahead of usual in this way. Another trick is to sow some seed of each packet a week or two before the normal time and then protect the young seedlings with paper caps, panes of glass or upturned flower pots until the weather really turns warm. Some people start a hill of melons, squash or even corn in a berry box indoors, then plant box and all outside without disturbing roots.

SPREAD THEM OUT

It is a mistake to plant all the vegetable seed in one afternoon. Far more satisfaction will result and much larger total yields as well as finer quality, where each packet is roughly divided into three parts. The first and smallest of these parts is sown in the early side and if they come through without serious frost we have some extra early vegetables. The second or main sowing goes in at the regular time, then from a fortnight to three weeks later we make the last sowing. With some quick maturing things like beans, carrots and beets, one can make even more sowings at intervals of a fortnight. In the warmer sections of the country it is possible to go right on planting most vegetables up to early July. By spreading out in this way we not only get a continuous supply of vegetables but we get that supply right at its best quality. To extend the season still further experts adopt the practise of sowing two or three different types of the main vegetable, an early maturing sort, a medium one and a late one. This is a particularly sound policy with such things as garden peas and corn, as the former must go in fairly early to get a start during the cool weather and the latter is not safe much before danger from the last frost is over.

Helpful Hints

To darn a glove finger easily, drop a marble into the finger to act as a darning egg.

Before washing a cardigan sweater, sew button holes together to keep them from stretching out of shape.

Drooping veils can be restored if you dip them in a gum arabic solution. Spread on towel to dry and

press with warm iron. Dissolve one tablespoon of gum arabic per cup of hot water. It takes at least an hour to dissolve.

Cheese will not harden if kept in a small glass or porcelain covered jar in which two cubes of sugar have also been stored.

Remove the fruit stains on the hands by rubbing them with salt moistened with vinegar.

Do You Know That...

The world's largest grain elevator is in Kansas City, Missouri.

Smile Of The Week

HAS EVERYTHING

The elderly spinster sniffed when anyone suggested that it was too bad she did not have a husband.

"I have a dog that growls, a parrot that swears, a fireplace that smokes, and a cat that stays out all night. Why should I want a husband?"

The famous highway connecting early Rome and Brundisium on the east coast of Italy was called the Appian Way.

Saving The Majestic Whooper From Extinction

According to some naturalists it is "just a matter of time" until there will be no more Whooping Cranes to grace the skies of North America. Yet, it was only a comparatively short time ago that these beautiful, large birds flew in great numbers, unmolested between their summer and winter homes. Now the chances of seeing one on the wing are extremely small.

Naturalists are greatly concerned over this situation, not only because this one particular species of bird is on the very brink of extinction, but primarily because the same tragedy might well, one by one, overtake other forms of wildlife. It has in the past—an example being the Buffalo which used to roam our western plains in great herds.

The sad part of the whole story is that nearly all forms of wildlife which have now, with the exception of museum exhibits, virtually been

Even though a mated pair had a maximum of three eggs in their nest, it was very uncommon for all to hatch, and more often only one bird hatched and survived. This is a factor which now very seriously hampers mankind's attempt to save them from extinction.

Last summer, possible breeding grounds were sighted near Great Slave Lake in the North West Territories by Bob Smith, a pilot for the ever, it is a serious offence to shoot a Whooping Crane, and each bird

wiped from the face of the earth, could have been saved from their fate. This could have been managed through education of the public to the need for, and value of conserving the species.

Preserving the Whooping Crane from extinction should be of special interest to the people of this province, for Saskatchewan is the real home and original nesting ground of the bird. It was conservatively estimated there were 1,300 species nesting in this part of the country during the summers of the early 1900's. Now, there are less than 25 in existence.

Nests were situated in large marshes, made of dead vegetation and debris about five feet in diameter, rising a foot or more above the U.S. Fish and Wildlife Service. The Whooping Crane is not a sociable bird, and as a result of settlers penetrating west and north into the province, they were slowly forced into the colder northern regions unsatisfactory for their own reproduction and survival.

The Whooping Crane spends its winters in the coastal regions of Texas and Northern Mexico, so that when migrating they must fly over most of Saskatchewan, Central North and South Dakota, Nebraska, Kansas, Oklahoma and Eastern Texas. During this long journey the Whooper must escape adverse weather and guns in the hands of careless and uneducated hunters.

When a Whooping Crane is shot by a hunter nowadays, it is not usually done on purpose. It is more commonly done because the hunter is unable to identify the bird, and the temptation of "bagging" such a large prize is too big to turn down. How- water level. A depression in the top held two or three eggs.

killed is an irreparable loss to the species.

A Whooping Crane can be easily identified. It stands about five feet in height and the adult is white with exception of black wing tips, legs and feet, yellow bills and red featherless heads. When in flight the bird has its neck outstretched and its long legs trail well behind its tail. The average wingspan is between five and seven feet.

The general public is asked to be on the alert during the coming nesting season for signs of Whooping Cranes returning to their native breeding ground. Anyone seeing one should report the incident at once to Fred G. Bard, director of the Provincial Museum, Regina, Saskatchewan.

Laws and regulations alone cannot save the Whooping Crane. The success or failure of this endeavour depends to a large extent on the people of this province.

PRINT PRAYERS ON RESTAURANT MENUS

MAMARONECK, N.Y.—Merchants and clergymen of this suburban village made arrangements to print Roman Catholic, Jewish and Protestant prayers on restaurant menus.

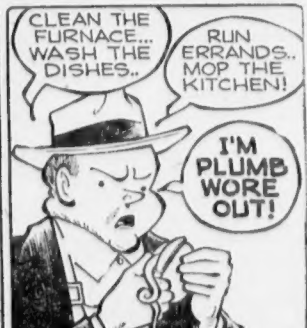

The clergymen said this would allow patrons to ask for Divine blessing while they are waiting to be served.

SANG WRONG SONG TO WIFE'S EYES

LOS ANGELES.—Her husband insisted on serenading her with the song, "Beautiful Brown Eyes", Mrs. Ruth Haughey complained in a suit for separate maintenance. Trouble was, said Mrs. Haughey, 47, her eyes are blue.

—By Al Vermeer

Peiping Regime Jittery Over Invasion Rumors

Residents of Shanghai and other coastal Chinese cities have seen almost continual war for 20 years. A Nationalist invasion from Formosa, to the majority of them, would be just a change of government.

By F. K. WU
(CPC Correspondent)

HONG KONG.—Any possible United Nations military move against Communist China to be undertaken by the new Eisenhower administration in the near future is anticipated by the "Central People's government" in Peiping, which may have completed some preparations to cope with the situation. American press reports speculated on the possibility of bombing of the China mainland, naval blockade of the long China coast, invasion of South China by Nationalist troops from Taiwan or Formosa and a U.N. drive to Manchuria from North Korea.

Such reports are seriously taken in Peiping. A recent editorial in the People's Daily, official newspaper of the Peiping Communist regime, said that the campaign against the United States and aid to North Korea is to be continued and strengthened in 1953 and that the Chinese Communists "are ready to pulverize the enemy in any place and manner of advance and attack. It is necessary to strengthen national defense, safeguard the rear and forestall nationalist coastal raids and all subversive activities."

Although Peiping in November last year hinted to India about willingness to resume peace talks on Korea, the Kremlin and Peiping have subsequently agreed that the Korean conflict shall continue for some time unless the U.N. is prepared to repatriate all Korean and Chinese prisoners of war, who are to be punished as a lesson to all ranks for the sake of discipline and morale and prevention of future surrender.

As the original Peiping readiness to have peace in Korea was later disavowed by Soviet Russia which has favored a continuation of the war, inspired press dispatches from London and Paris asserted that chairman Mao Tse-tung of the Peiping regime and his colleagues are likely to become Titos as predicted from time to time from those quarters.

Such rumors or wishful thinking are set at rest by Premier and Foreign minister Chou Enlai who said that "Russian-Chinese friendship is unbreakable and that such tie is not only building up the vast reconstruction of the two great countries but also maintains that invincible peace in the Far East and the world."

Alexander S. Panyushkin, the newly installed Soviet ambassador in Peiping, echoed by saying that Russia-Chinese friendship is beneficial not only to the U.S.S.R. and China but constitutes mighty strength hitherto unknown in the history of mankind. The ambassador stressed such strength as the biggest obstacle to the invasion plans of the United States and other imperialistic powers.

Given every indication of war preparations, an official Peiping statement enumerated the following projects for the current year:

1—A bigger victory in Korea through more aid to Korea and greater resistance to the United States.

2—Enforcement of a five-year industrial plan as a beginning of national reconstruction and completion of construction projects for 1953.

3—Convocation of a People's representatives assembly to approve a constitution and national construction plan.

Radio Canton recently announced that 1953 marks the change of China from an agricultural country to a highly industrialized state. The emphasis is on heavy industries.

Inauguration of heavy industries means the production of tanks, guns

and other heavy weapons of war in the interpretations of Chinese observers here. Raw materials are to be produced by autumn in the An Shan steel centre about 50 miles south of Mukden in Manchuria which will be operated by 100,000 Chinese workers.

Radio Peiping proudly pointed out that the able assistance of Soviet engineers has made it possible for the new plant to turn out iron and steel in large quantities represented in percentage figures best understood by the Communists themselves. The heavy industries are intended to be scattered in Manchuria following the return of some machinery stripped by Russian soldiers who moved in after V-J Day in 1945.

This vast steel producing scheme is included in the five-year industrial plan which was announced by the Tass News Agency and is now broadcast repeatedly by Radio Peiping.

Eventually the arsenals in Manchuria and northwest China are expected to turn out tanks, guns, heavy machine guns, trucks and all the paraphernalia of war instead of depending on Soviet supplies, although Communist press reports are careful in avoiding any mention at all of the war potential of the new industries. Officially both Peiping and Moscow are committed to a policy of "world peace"—on their own terms.

According to well-informed sources here, the Peiping regime will ballyhoo the five-year plan as the foundation of national reconstruction, because of the many projects will absorb millions of unemployed and will probably make good the Communist promise of 1950 of giving a job for every person. Actually Communist China has to put its industries on a war footing in order to fit the Russia "world peace" program by "liberating" countries outside of the Iron Curtain.

At the same time the Peiping regime will utilize the urgency of this plan as an excuse to extort more money from the already harassed people. The same informed sources pointed out that while it is no easy matter to convert a vast and old country like China from an agricultural to an industrial nation in a short time, the many new industrial projects will require enormous sums of money which have to be raised from the people by taxation, extortion and further inflation of the paper money known as jen min piao.

These sources predict a gloomy economic future for Red China despite its many reports of increased production, retrenchment and other rosy account.

HEALTH

COURAGE TO APPLY BIOLOGY NEEDED IN OPINION OF DR. HAVEN EMERSON

TORONTO.—Dr. Haven Emerson, Professor Emeritus of Public Health Administration of Columbia University, New York, was a special guest at the 33rd annual meeting of the Health League of Canada, in Toronto. Dr. Emerson addressed the final dinner on "What Preventive Medicine Has Accomplished and What Remains to be Done".

One-time Health Commissioner of New York City, Dr. Emerson is a pioneer in recognizing the social and economic factors which so powerfully influence public health. As far back as 1922 he was discussing these factors in relation to the tuberculosis death rate.

"Throughout his career, Haven Emerson has been not only a wise prophet, but an ardent propagandist," sums up Dr. C. E. A. Winslow of Yale University. "Dr. Emerson's greatest practical contributions have been made as chairman of the American Public Health Association's committees on Control of Communicable Diseases and on Local Health Units."

Dr. Emerson himself said this in his presidential address to the American Public Health Association some years ago: "If I were challenged to describe the elements necessary to assure further improvement of human health in our associated nations, these three would seem real and pressing; some increase in effective intelligence; something of the spirit of religious devotion even to the point of self-denial in the material possessions and accessories of today's life; and lastly, courage to apply what biology has taught us to believe."

A K Q J 6
A K Q J 6
A K Q J 6
A K Q J 6

This pairs contest deal produced one of last season's major sensations. An East player had the unique thrill of doubling two experienced opponents in a contract of Six Spades!

West opened Three Diamonds and North gave no thought to distributional squalls, preferring a Four Diamond cue bid to a more politic jump to Four Hearts. East doubled, but South placed his partner with great strength in both majors. Holding three possible key cards a free bid of Four Spades seemed supremely logical.

North read this call in a different light and raised to Six Spades. After the lead of OK it was immaterial whether a Spade or a Heart was played at trick 2—the defenders were bound to win 11 tricks.

HAVE TO BE TRAINED

LONDON.—British Overseas Airways Company now has eight fully-trained attendants who cope with the "monkey airlift", which flies hundreds of monkeys each week from the Far East. They receive tips from experts on monkey diet and emergency treatment of any monkey ailments.

The great golden eagle, with a wingspread of 7½ feet, is the largest bird in North America with the exception of the California condor, which measures 10 feet across.

TIPTOE THROUGH THE CLAIM STAKES

—Les Callan in The Toronto Daily Star

World Happenings Briefly Told

Anti-submarine vessels and mine-sweepers have top priority in Britain's naval rearmament program, the Government announced.

American soldiers in Korea are being asked to surrender a treasured trophy—the battered steel helmet. Research is under way on a new, lightweight nylon helmet.

Extended drought forced strict rationing of power in Narvik and some other communities recently as power plants in north Norway were threatened with a complete shutdown.

The Stockholm newspaper Dagens Nyheter reported that the Russians plan to remove the civilian population from Stettin, a German port on the Baltic, and convert it to a closed naval base.

The United States has more radios in use than all the rest of the world, a United Nations report said. The U.S. radio total, according to the U.N. statistical yearbook for 1952, is 105,000,000.

Women voted for the first time in Indo-China's history in a local election in Dalat city seat of Bao Dai, the head of state. They formed queues outside the polling booths after visiting the mourning market or attending religious services.

Amateur "spotters" who study the movements of trains, airplanes and buses have become so numerous in Britain that a special publication, "every spotter's weekly", has been launched. Besides news items it carries hints such as what pad and pen to use.

Manchester, England, at the start of the year had 3,000 registered unemployed men because of a textile industry slump, according to the labor ministry. Vacancies numbered less than 600, whereas a year ago there were two jobs for every applicant.

Octopi may have a tentacle spread of as much as 28 feet.

—Central Press Canadian.

GIVEN HEAVE FROM HOLLAND

—Ley Pissarev, correspondent for Tass, Russian news agency at The Hague, is shown in a police car en route to a ship at Amsterdam for deportation to Russia. Dutch authorities said that Pissarev was spying for the Soviets and had offered gifts of champagne to high Dutch officials in attempts to get NATO defence secrets from them.

GEMS OF THOUGHT

ECONOMY

Ere you consult fancy, consult your purse.—Franklin.

Economy is half the battle of life; it is not so hard to earn money as to spend it well.—Charles H. Spurgeon.

Mere parsimony is not economy.—Edmund Burke.

Governments have no right to engraft into civilization the burlesque of uncivil economics.—Mary Baker Eddy.

A sound economy is a sound understanding brought into action.—Hannah More.

The world abhors closeness, and all but admires extravagance; yet a slack hand shows weakness, and a tight hand strength.—Buxton.

On The Side : By E. V. Durling

As I have frequently said, very few present-day baseball fans have much of a knowledge of the game. It is amazing the number of diamond enthusiasts considering themselves well informed who are unable to answer these two simple questions. 1. How can a batter drive in three runs without hitting a fair ball? 2. How can a batter have 10 pitches served to him, none of them fouls, and still be at bat?

Quality and Quantity

I am asked what is considered the world's greatest automobile. According to the experts on the subject, it is the Rolls-Royce. Incidentally, the Nizam of Hyderabad has 50 Rolls-Royce cars. He still makes use of the first Rolls-Royce he bought, a 1911 model. This 42-year-old car is still running smoothly. Another Indian, the Maharajah of Patiala, bought 35 Rolls-Royce cars at one time. The most elegant Rolls-Royce now in use is that owned by Queen Elizabeth. It is a limousine 19 feet long and 6 feet high.

Short and Sweet

It was the philosopher Nietzsche who said, "Two things are wanted by the true man: Danger and play. Therefore, he seeketh woman as the most dangerous toy." In Manhattan there is a barber shop which specializes in haircutting. The sign on the establishment reads, "No shaves. No tonic. No shines. No manicures. No tips. No conversation." The younger the mother, the better the chance that the first child will be a boy, so the records indicate. Mothers between 15 and 19 have the highest percentage of male children.

Briefly Speaking

It is well to keep in mind that the Bible does not say, "Money is the root of all evil," but that "the love of money is the root of all evil." That baseball hall of fame is a ridiculous proposition. It is beyond me how anything can be rightly called a "baseball hall of fame" and ignore such diamond immortals as Chief Bender, Rube Marquard, Joe DiMaggio, Hank Gowdy and "Rabbit" Maranville. Film actresses with beautiful legs are plentiful. Those with beautiful hands are scarce. Rita Hayworth is one of the few cinema stars having well-shaped hands.

For the Egg Connoisseur

Those who ask to have their fried eggs "turned over" have extremely poor taste and don't deserve to have eggs. "Sunny side up" for fried eggs and four minutes' boiling for boiled eggs. That's the way the discerning egg consumer with a cultured taste orders them. However, the low in taste as to the consuming of eggs is the poached egg on corner beef hash. It ruins both the egg and the hash. There should be a law against it.

High Standard

Queries from clients. Q. What are said to be the "four attributes of a lady?" A. Sincerity, simplicity, sympathy and serenity.

Problem for Puzzle Experts

Following is a problem a reader challenges me to solve: "My husband's age is represented by the figures of my own age reversed. He is my senior and the difference between our ages is 1/11 of their sum."

Expectant Mothers

An expectant mother should not smoke more than five cigarettes a day. An excess of that will have a bad influence on the expected child's nervous system and possibly make it subject to an excessive amount of colds and respiratory illness. Such is the claim of experts on the subject.

An Expensive Sneer

In a luxury restaurant in New York, a waiter made some nasty remarks to a patron who had offered a \$13 tip for a party of four when the check had come to \$77. The waiter said he usually received a \$25 tip from each of his four tables. That is, \$100 in tips nightly! A nearby government official heard the argument. As a result, the waiter's income tax return was checked. The waiter ended up paying the government \$4,200 in taxes on unreported income! All because he sneered at a \$13 tip.

Still Going Strong

It is claimed the high-salaried period of the average film star is generally brief, but quite a few cinema luminaries continue to collect fancy pay cheques for lengthy periods. As for examples, the 10 best box-office attractions among film stars of 10 years ago are all still going strong. Listed as the 10 best film box-office stars of 1942 were: 1. Abbott and Costello. 2. Clark Gable. 3. Gary Cooper. 4. Mickey Rooney. 5. Bob Hope. 6. James Cagney. 7. Gene Autry. 8. Betty Grable. 9. Greer Garson. 10. Spencer Tracy.

OUR COMPLETE SHORT STORY—

SO LONG, MOLLY

She Always Had a Warm
Smile and a Big Hug
And Kiss.

By Addison H. Hallock

THERE are some things a wife just wouldn't know about. Like how a man wants her to look as smooth as other wives—a little smoother even. Maybe a guy doesn't say much, but deep down he feels it. If he catches other dames eyeing his best girl because she happens to look shabby, he—well, he doesn't like it. But you can't let on to the little lady how it is. Especially when it's your fault. You keep your mouth shut, if you're any kind of guy at all.

Molly—that's my wife—isn't the complaining kind. If her hemline is higher than the other girls' she just laughs, "This new look, I'm not the type." Remember when all the gals came out with those dark nylons? I asked her why she didn't get some.

"What with?" asked Molly, and blushed. She didn't mean to let that slip out, and I knew it. I pretended not to notice. "Oh, Bill," she added quickly, "I don't like those dark colors, they depress me," and said it as though she meant it. But she wasn't fooling me. Molly holds her head as high as any of them. To look at her, you'd never know she'd brought four kids into the world, either; five, counting the one we lost in child-

birth. How she keeps that swell figure of hers is beyond me. You'd think she was twenty instead of thirty-four.

A girl like Molly deserves the best. And, believe me, when I happened to look into our closet for something one night and discovered that she had only a frayed suit and a couple of dresses that had seen better days I didn't like it. Not that we were going out anywhere. I couldn't handle that part of it any better than I could clothes, what with the government grabbing a share of everything I was bringing home, and that wasn't much.

Apparently the only thing worrying Molly was me—and the kids, of course. "Bill," she'd say, "you need a new hat," or, "honestly, Bill, that suit of yours! It's falling apart. We'll have to get you a new one. After all, your job..." And sure enough Molly arranged it so I got the hat—and the suit, too, though I'll never know how. And the kids didn't go hungry, either.

Well, it got so that every time I looked at Molly, I'd feel lower and lower. Night after night I'd come home, and there'd be Molly in the kitchen, tired but neat as a pin. She always had a warm smile, and a big hug and kiss. And me? Sure, I was working hard—but wasn't getting anywhere. I didn't have the kids on my neck all day, like Molly. Same job, same salary, week after week, year after year—that was me. I couldn't manage to bring home cheap toys for the kids, let alone afford to take Molly to a movie!

But, like I say, there are some things a wife wouldn't know about. Like how he feels a failure. Like how, all of a sudden, something snaps. A man goes berserk. And, finally, he does something.

What does he do? Well, there's no predicting. One man does one thing; another something else. Maybe what he does will hurt those closest to his heart. Even if he's only trying to help. You can't blame a wife—especially a sweet, undemanding wife like Molly—to know there are some things a guy will steal for, maybe even commit murder for. You can't expect a wife to know about things like that, except, maybe, after it's too late.

I've been thinking a lot lately. About Molly and me... and the kids. A wonderful wife, Molly. And kids a father can be proud of. Yes, I've been thinking. I've had time to think, plenty. But there isn't much left, now. Time is running out. But I still keep wondering about what might have been.

The turnkey asked me a little while ago what I wanted to eat. Said I could have anything I wanted to-night. But I just said I guessed I wasn't very hungry, somehow. He smiled in a sad sort of way and shook his head. Then he went away. The turnkey is coming back now. I'd recognize that shuffle anywhere. He's been nice to me, the turnkey has. But I'm still not hungry. I guess it doesn't matter. There's not much more time, now, anyway.

McBride, B.C., Residents Build Own Airport

McBRIDE, B.C.—Residents of this central British Columbia town and district have built their own airport to keep in step with B.C. growth.

Full use of the airport is expected soon. Only single-engine craft have used it so far, but it is said to be capable of accommodating twin-engine planes and future expansion is anticipated.

The present runway is 1,800 feet long and 200 feet wide.

The story of the airport is one of co-operation and contribution—\$15,000 donated by district residents and industry; heavy equipment loaned by logging companies; fuel donated by oil companies and labor volunteered by almost everyone.

The strip was laid on land donated by a resident, Adolph Jack, and the construction campaign was laid by D. A. Aker.

McBride has a population of approximately 500.

IT WAS RATS NOW ITS CATS

TWICKENHAM, England.—Three cats were set loose at a rubbish disposal works here 20 years ago to keep down rats and mice. The place has been rat-free for years but the council now wants to know how to get rid of 200 wild cats there.

WAS WELL-TIMED

MOOSE JAW, Sask.—It was a timely departure for Jack Johnstone. A few hours after he had handed over his long-time home to a new owner, a careening truck wrecked the fence and front porch.

The House of Lancaster, which once ruled England, was a branch of the House of Plantagenet, an earlier ruling family.

3029

Taj Mahal, name of the beautiful tomb in India, means "Crown of the Palace", one of the titles of the wife of the Shah for whom it was built.

Itch..Itch...I Was Nearly Crazy

Very first use of soothing, cooling liquid D. D. D. Prescription positively relieves raw red itch—caused by eczema, rashes, scapillation, chafing—other itchy troubles. Grazeless, stainless, 43c trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION

You get cleaner,
better grain with
SEED PROTECTION

this spring,
use the **Green Cross**

**BIG 4 SEED GRAIN
DRESSINGS!**

THE ENEMIES:

Smut, other Seed-borne Diseases, Wireworms—these crop-killers cost you and other grain-growers thousands of dollars every year. This is a needless loss because they can be controlled by proper treatment of seed before it's planted.

THE ANSWER:

the Green Cross Big 4 Seed Grain Dressings—a complete seed treatment program that includes the tested and proven dressings you need to protect your crops from the pests found in your area.

1. MERLANE

the amazing new combination seed disinfectant that controls smut, other seed-borne diseases and wireworms in one operation! Costs less than \$1.10 per acre of wheat, coarse grains, and less than \$1.10 per bushel of corn and beans!

2. SAN

another great new seed disinfectant that controls smut and other seed-borne diseases in wheat, coarse grains and flax! Application cost is less than 5¢ per bushel of wheat and coarse grains and less than 13¢ per bushel of flax!

3. BUNT-NO-MORE

the non-mercurial seed disinfectant that kills bunt (stinking smut) in wheat! Apply it for less than 4¢ per bushel!

4. 50% LINDANE

the proven seed dressing that destroys wireworms attacking cereal crops. Costs less than 95¢ per acre!

If you prefer a liquid seed dressing

3 Dessert Treats from One Basic Dough!

It's easy with
wonderful active dry yeast!

NEEDS NO
REFRIGERATION!

Say goodbye to humdrum meals! Turn one tender-rich sweet dough into these three yummy dessert treats! It takes no time at all—with the amazing Fleischmann's Fast Rising Dry Yeast! This lively, zesty yeast acts fast... gives perfect risings every time. If you bake at home, buy several packages now.

BASIC FRUIT DOUGH

Prepare
1½ cups bleached or sulfone raisins,
washed and dried
½ cup finely-cut candied citron
½ cup broken walnuts or pecans
Scald
2 cups milk
Remove from heat and cool to lukewarm.
In the meantime, measure into a small bowl
½ cup lukewarm water
2 teaspoons granulated sugar
and stir until sugar is dissolved.
Sprinkle with contents of
2 envelopes Fleischmann's Fast Rising
Dry Yeast
Let stand 10 minutes, THEN stir well.
Sift together three times
4 cups once-sifted bread flour
1 tablespoon salt
4 teaspoons ground cinnamon
¼ teaspoon grated nutmeg

¼ teaspoon ground cloves
¼ teaspoon ground mace
Cream in a large bowl
½ cup butter or margarine
¾ cup lightly-packed brown sugar
Gradually beat in
1 well-beaten egg
Stir in lukewarm milk, dissolved yeast and sifted dry ingredients; beat until smooth and elastic.
Mix in prepared fruits and nuts.
Work in
¾ cups (about) once-sifted bread flour
Turn out on lightly-floured board and knead dough lightly until smooth and elastic. Place in a greased bowl and grease top of dough.
Cover and set dough in a warm place, free from draft, and let rise until doubled in bulk.
Turn out dough on lightly-floured board and knead lightly until smooth. Divide into 3 equal portions and finish as follows:

1. Chop Suey Loaf

Knead ¼ cup well-drained cut-up maraschino cherries into one portion of the dough. Shape into a loaf and fit into a greased bread pan about 4½ by 8½ inches. Grease top. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, about 40 minutes. Brush top of hot loaf with soft butter or margarine.

2. Butterscotch Fruit Buns

Cream together ½ cup butter or margarine, ½ teaspoon grated orange rind, ¼ cup corn syrup and 1 cup lightly-packed brown sugar. Spread about a quarter of this mixture in a greased 9-inch square cake pan; sprinkle with ½ cup pecan halves. Roll out one portion of dough on lightly-floured board into a 9-inch square. Spread

almost to the edges with remaining brown sugar mixture; roll up loosely, jelly-roll fashion, and cut into 9 slices. Place each piece, a cut side up, in prepared pan. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, about 30 minutes. Stand pan of buns on a cake cooler for 5 minutes before turning out.

3. Frosted Fruit Buns

Cut one portion of dough into 18 equal-sized pieces. Shape each piece into a smooth round ball. Place, well apart, on a greased cookie sheet. Grease tops. Cover and let rise until doubled in bulk. Bake in a moderate oven, 350°, about 15 minutes. Immediately after baking, spread buns with a frosting made by combining 1 cup once-sifted icing sugar, 4 teaspoons milk and a few drops almond extract.

Level Land

Mrs. Jean Fontaine of Battle Lake was visiting with the S.D. A. Church and Chandlers.

Mrs. Fred Metzger of Calgary visited with her parents, Mr. and Mrs. Ben Huether over the weekend.

W. D. MacDonald of this district had eight purebred Shorthorn bulls at the Calgary Sale last week.

Mrs. Carl Fischer of Calgary was a week with the Schabers helping take care of her mother and the work.

Edgar and Gideon Tetz of this district had two Shorthorn bulls at the Calgary Bull Sale and Stock Show.

Mrs. Daniel Skortez of Prince Albert, Sask. is visiting with her parents, Mr. and Mrs. J.A. Gimbel. Mr. Skortez is Pastor of a number of churches in the Prince Albert district.

Mrs. Ben Huether of this district regrets to inform us that her chance to make a fortune on a radio quiz program turned out to be a false alarm. However, she wishes that Emil Lang would hurry to send her that bag of consolation prizes.

Mr. and Mrs. Dave Trenchuk of Edmonton were visiting at the home of Mrs. Trenchuk's uncle, Mr. and Mrs. Ben Krenzler for the weekend. Mr. and Mrs. Joe Trenchuk of Edmonton were visiting with Mrs. Trenchuk's brother, Mr. and Mrs. Willard Huether.

On behalf of the Canadian Red Cross, I want to thank all the donors in township 28 and range 24 and also the 2 miles south of the same township up to the Rosebud creek for your loyalty and support of the Red Cross. Your help has never before been needed as it is now, and again I want to thank you. We of this township have raised \$533.12.

A group from Canadian Union College came down March 20th to give a number of programs in this district during the weekend. A program of sacred music was given in the S.D.A. Church on Friday night and special music was to have been provided throughout the Sabbath Services and a secular program in the hall on Saturday night. Because of bad weather these last programs had to be cancelled. We were very sorry that the programs could not be given as planned. The group left Sunday morning. Members of the group were: Mr. P.G. Miller, Principal of the high school dept.; Mr. Wm. Haynes, vocal teacher and choir director of C.U.C., Mrs. Haynes, Victoria Tkachuck, Evelyn Schram, Alice Fitch, Frances and Ruby Bader, Geraldine Roth, Amerylis Gramms, Marjorie Leiske, Don French, Ralph Coupland, Norman Matiko, Bob Koronko, and Bob Huether.

Howard Gimbel from Walla Walla College, Wash. was visiting with his parents, Mr. and Mrs. J.A. Gimbel for a few days.

Ruth and Gordon Smedly and Lydia Manweiler of Canadian Union College and Mrs. Smedly were visiting with Mr. and Mrs. F.G. Tetz of Acme over the weekend. Mrs. Tetz is Mrs. Smedly's mother.

The Big Annual Easter Monday Dance will be held April 6th in the Beiseker Memorial Hall.

The Annual Meeting of the Acadia Federal Liberal Association will be held in the Memorial Hall at Hanna on Wednesday afternoon, April 15th at 1:30 p.m.

This will also be a nominating Convention to select a Liberal Candidate to contest the next Federal Election.

JAPANESE & CANADIAN AG.

It is good sometimes to compare the bountiful things we have available in our own country with those possessed by others.

Japan, for instance, has just issued a handbook describing her agricultural resources. Japan, it appears, with eighty million people has only fifteen million acres of cultivated land, or .18 of one acre per person. The average size farm is two acres only. Very few farms are as large as seven acres. Compare this with Canada where fifteen million people have eighty-two million acres of cultivated land, an average of 5½ acres per person. The average Canadian farm has 132 acres of cultivated land.

Comfort in the Cab

and dollars in the bank

Chevrolet Trucks are first because they're finest—feature for feature—in performance, economy and just plain value for your money. Take a look at the cab for example. It's "Driver-Conditioned", seats 3 big men with ease. Full width seat cushions, easy access doors and placing all controls in easy handling range provide unusual driver comfort and convenience. Impressive? Sure it is. But the cab is just one of many Chevrolet "Advance-Design" features that add up to one BIG advantage — Chevrolet trucks are the world's leading money makers on any hauling job. What more proof could you ask than the fact that truck operators, recognizing this, buy more Chevrolet trucks than any other make. Why not see your Chevrolet dealer today?

Chevrolet Driver-Conditioned Cabs

FLEXI-MOUNTING — Husky rubber cushions cut effects of chassis vibration and frame weave to increase truck life, add extra driver comfort under the toughest conditions.

SEAT SPRINGS — Seats have Double-Deck springs, cushiony, Latex-treated hair and cotton topper pad, hard-wearing leatherette cover that looks better, lasts longer.

VENTIPANES — Draft-free or forced ventilation just by adjusting ventilapanes to desired angle.

BATTLESHIP CONSTRUCTION — For driver safety, this cab is a single, all-welded, double-walled steel unit that gives maximum protection for all occupants.

ALLIGATOR JAW COUNTER-BALANCED HOOD — Easy access to the engine and good visibility come through the alligator jaw hood that stays open easily without a prop.

ADJUSTABLE SEAT — Fingertip control permits easy adjustment. Seat moves full 3½" forward, back tilts, seat rises for proper eye-level vision and shoulder support.
